

Website Redesign & Development Proposal

Project Title

Complete Website Redesign, Development & SEO Optimization

Project Overview

The objective of this project is to redesign and redevelop the existing website into a modern, fast, secure, SEO-friendly, and conversion-focused platform that effectively serves both **Domestic** and **International** customers.

The new website will feature an improved user experience, modern interface, optimized performance, dynamic content management, and a scalable architecture while preserving the existing SEO value and enabling future growth.

Project Objectives

- Modernize the existing website
 - Improve customer experience
 - Increase inquiries and online bookings
 - Improve website speed and security
 - Enhance search engine visibility
 - Organize content for better accessibility
 - Simplify website management through a custom admin panel
 - Build a scalable platform for future enhancements
-

Technology Stack

The website will be developed using a lightweight, secure, and high-performance technology stack.

Backend

- Laravel 12 (Latest Stable Version)
- PHP 8.3+
- MVC Architecture
- RESTful Development Standards

Frontend

To maximize performance and SEO, the frontend will be built without heavy JavaScript frameworks.

- HTML5
- CSS3
- Bootstrap 5
- Laravel Blade Templates
- Vanilla JavaScript
- jQuery (Only where required)
- AJAX (Only for dynamic functionality)

No React, Vue.js, Angular, Next.js, or other frontend frameworks will be used.

This approach provides:

- Faster Loading Speed
 - Better SEO
 - Lower Server Resource Usage
 - Improved Security
 - Easier Maintenance
 - Excellent Browser Compatibility
-

Database

- MySQL 8.x
-

Content Architecture

A complete review and restructuring of the website content.

Deliverables

- Content Collection
 - Content Planning
 - Content Organization
 - Content Categorization
 - Content Publishing Strategy
 - Information Hierarchy
 - Better User Flow
-

Website UI/UX Redesign

Complete redesign with a modern, professional, and user-friendly interface.

UI Improvements

- Modern Layout
- Professional Design
- Better Typography
- Better Color Palette
- Consistent Design System
- Improved Visual Hierarchy
- Modern Icons
- Attractive Animations (Lightweight)
- Enhanced User Interactivity

UX Improvements

- Easy Navigation
- Better Customer Journey
- Reduced Clicks
- Faster Information Access
- Conversion-Focused Layout
- Improved Mobile Experience

Homepage Redesign

The homepage will be redesigned to effectively target both international and domestic customers.

Homepage Features

- Hero Banner
- Dynamic Slider
- Featured Umrah Packages
- Featured Hajj Packages
- Featured Tourism Packages
- Company Introduction
- Why Choose Us
- Services Overview
- Customer Testimonials
- Travel News
- Promotions
- Partner Logos
- Quick Inquiry Form
- WhatsApp CTA

- Call Now CTA
 - Book Now CTA
-

Package Management System

A fully dynamic package management module.

Dynamic Package Categories

- Umrah Packages
- Hajj Packages
- Tourism Packages
- Seasonal Packages
- Featured Packages
- Promotional Packages

Each package will include:

- Images
 - Price
 - Duration
 - Hotels
 - Flights
 - Package Details
 - Itinerary
 - Inclusions
 - Exclusions
 - Booking Button
-

Hajj & Umrah Section

- Logical placement of Hajj Orientation
 - Improved Umrah Section
 - Merge Existing Umrah Menu with Winter Packages
 - Better Category Structure
 - Easy Package Comparison
-

Media Center

Complete redesign of media section.

Includes:

- Image Gallery
 - Video Gallery
 - Event Gallery
 - Promotional Videos
 - News Updates
-

Contact Page

Modern and conversion-focused contact page.

Features:

- Contact Form
 - Google Maps
 - Office Locations
 - WhatsApp Integration
 - Click-to-Call
 - Email Links
 - International Contact Details
 - Domestic Contact Details
 - Office Timings
 - Social Media Links
-

Navigation Improvements

- Mega Menu (if required)
 - Dropdown Navigation
 - Sticky Header
 - Mobile Navigation
 - Breadcrumb Navigation
 - Quick Links
-

Footer Redesign

Complete redesign with full content coverage.

Includes:

- Company Information
 - Packages
 - Services
 - Useful Links
 - Contact Information
 - Office Address
 - Social Media
 - Privacy Policy
 - Terms & Conditions
 - Refund Policy
 - Copyright
-

Policy Pages

Review and redesign:

- Privacy Policy
 - Refund Policy
 - Cancellation Policy
 - Booking Policy
 - Visa Policy
 - Terms & Conditions
-

Booking Form Enhancement

Review and redesign booking forms.

Features:

- Better UX
 - Form Validation
 - Mobile Friendly
 - Secure Submission
 - Easy Inquiry Process
-

Custom Development

Custom Laravel modules where required.

Includes:

- Dynamic CMS
 - Homepage Management
 - Package Management
 - Contact Management
 - Testimonials
 - FAQ Management
 - Media Management
 - News Management
 - SEO Management
 - Inquiry Management
-

Responsive Design

Fully responsive across:

- Desktop
- Laptop
- Tablet
- Mobile

Compatible with:

- Chrome
 - Edge
 - Firefox
 - Safari
-

Call-to-Action Optimization

Strategically placed CTAs including:

- Book Now
 - Apply Now
 - WhatsApp Us
 - Get Quote
 - Call Now
 - Contact Us
 - Request Callback
-

Search Engine Optimization (SEO)

Careful planning will ensure that existing SEO rankings are preserved while improving overall search visibility.

On-Page SEO

- SEO Meta Titles
- SEO Meta Descriptions
- SEO Friendly URLs (Slugs)
- Open Graph Tags
- Twitter Cards
- Image ALT Tags
- Internal Linking
- Heading Structure (H1-H6)

Technical SEO

- XML Sitemap
 - Robots.txt
 - Canonical URLs
 - Schema Markup
 - SEO Indexing
 - Page Speed Optimization
 - Mobile Optimization
-

Performance Optimization

The website will be optimized for maximum speed.

Includes:

- Optimized Database Queries
 - Lazy Loading
 - WebP Images
 - CSS Minification
 - JavaScript Minification
 - Browser Caching
 - GZIP/Brotli Compression
 - Optimized Fonts
 - CDN Ready Architecture
-

Security

Laravel security best practices will be implemented.

Includes:

- CSRF Protection
 - XSS Protection
 - SQL Injection Protection
 - Input Validation
 - Secure Authentication
 - Password Hashing
 - Secure File Uploads
 - SSL Compatibility
 - Security Headers
-

Third-Party Integrations

- Google Analytics 4
 - Google Search Console
 - Google Maps
 - WhatsApp Integration
 - SMTP Email Configuration
 - Payment Gateway Integration
 - Social Media Integration
 - Google reCAPTCHA
-

Admin Panel

A custom Laravel Admin Panel will allow administrators to manage website content without coding.

Modules include:

- Dashboard
- Pages
- Packages
- Sliders
- Media Gallery
- News
- Testimonials
- FAQs
- Contact Information

- Inquiries
 - SEO Settings
 - Users & Roles
 - Website Settings
-

Testing & Quality Assurance

Before deployment, the website will undergo:

- Functional Testing
 - Responsive Testing
 - Browser Compatibility Testing
 - Performance Testing
 - Security Testing
 - SEO Validation
 - Form Testing
 - Link Validation
-

Deployment

Deployment includes:

- Hosting Configuration
 - Domain Configuration
 - SSL Installation
 - Database Migration
 - Email Configuration
 - Live Website Deployment
-

Deliverables

Upon project completion, the following will be delivered:

- Fully Redesigned Website
- Custom Laravel CMS
- Responsive Design
- Dynamic Package Management
- Media Center
- Contact Management
- SEO Optimization
- Google Analytics Integration

- Payment Gateway Integration
 - Optimized Performance
 - Secure Application
 - Admin Panel
 - Documentation (if required)
-

Optional Future Enhancements

The architecture will support future upgrades such as:

- Online Booking System
 - Customer Portal
 - Agent Portal
 - Online Visa Application
 - Multi-Language Support
 - Multi-Currency Support
 - Mobile Application (Android & iOS)
 - CRM Integration
 - AI Chatbot
 - Live Chat
 - Push Notifications
-

Project Timeline

Phase	Estimated Duration
Planning & Analysis	1 Week
UI/UX Design	2 Weeks
Development	4 Weeks
Testing & QA	1 Week
Deployment	2-3 Days

Estimated Total Duration: 8 Weeks

Warranty & Support

After successful deployment:

- 30 Days Bug Fix Support
 - Performance Monitoring
 - Minor Adjustments (if required)
-

Maintenance (Optional)

Optional Annual Maintenance Contract (AMC) can include:

- Regular Website Updates
 - Security Patches
 - Performance Monitoring
 - Backup Management
 - Feature Enhancements
 - Technical Support
-

Expected Outcomes

The new website will deliver:

- Modern & Professional Appearance
 - Faster Website Performance
 - Better User Experience
 - Increased Customer Inquiries
 - Improved Conversion Rate
 - Higher Search Engine Rankings
 - Secure & Scalable Architecture
 - Easy Content Management
 - Long-Term Maintainability
-

Conclusion

This project aims to transform the existing website into a high-performance digital platform that reflects the organization's professionalism while delivering an exceptional experience for both domestic and international customers. By leveraging Laravel, HTML5, CSS3, Bootstrap 5, and a lightweight architecture, the website will achieve excellent speed, strong security, superior SEO performance, and seamless content management, ensuring long-term scalability and business growth.
